DETAILED ACTION

Transitional After Final Practice

1. Since this application is eligible for the transitional procedure of 37 CFR 1.129(a), and the fee set forth in 37 CFR 1.17(r) has been timely paid, the finality of the previous Office action is hereby withdrawn pursuant to 37 CFR 1.129(a). Applicant's second after-final amendment submission after final filed on 05/19/04 has been entered.

Remarks

2. Claims 1-7, 10-26 and 34 were cancelled in the second after final amendment dated 05/19/04. Pending claims are 8-9 and 27-33.

Drawings

3. The drawings filed on October 30, 1998 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Allowable Subject Matter

4. Claims 8-9, and 27-33 are allowed.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The closest prior art issued to Kikuchi, Sakai, and Robbins fails to either alone or combine to teach or suggest a passthrough circuit for use in a cable television converter for passing a tuned signal from a tuner to a radio frequency modulator for output to external equipment comprising a first signal path and a second signal path *wherein the first signal path arranged to receive a tuned signal from a tuner and to provide a NICAM signal component of the tuned signal to a radio frequency modulator*, and at least including the step of “wherein the second signal path comprises: a channel surface acoustic wave filter, arranged to receive the tuned signal from the tuner and to filter the tuned signal to generate a filtered signal; an intermediate frequency strip, configured and arranged to amplify the filtered signal; a dual surface acoustic wave filter, configured and arranged to separate the amplified filtered signal into audio and video signal components; an audio and video amplifier, operatively coupled to the dual surface acoustic wave filter and configured and arranged to amplify the audio and video signal components; and an audio/video demodulator, configured and arranged to downconvert the amplified audio and video signal components to their respective baseband frequencies and to provide the downconverted audio and video signal components to the radio frequency modulator.” The combination of Kikuchi, Sakai and Robbins does not come up to the passthrough circuit with a combination of the first signal path and the second signal path as specifically arranged with detailed components as cited therein, and importantly, none of the prior art to provide a motivation to come up with the combined circuitry as presented.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
